

GEOFFREY MAINA & IAN WANYOIKE

MONTHLY REVENUE SUMMARY

DOCUMENTATION

A schedule Trigger begins workflow on first day of every month at 8pm where it fetches data from two sheets ;one having information about the revenue that Fit Life Gym gets from its clients and the second one having details on the attendance progress of members.

The details are merged and aggregated to form a single list which is then fed to an AI Agent that unites the members progress report and financial report then formulates a summary and a second AI Agent converts the summary to a HTML version.

An Email is then sent to the owner of the gym through Gmail for reviewal.
